Maria Camila Mejia

Software Developer

Full stack developer with experience building and maintaining web applications. Proficient in languages such as JavaScript/TypeScript, using NodeJS on the server side and React as the frontend framework. Experienced in database management with SQL and version control systems like Git.

Experience

September 2022 - Present

Nearhands/Inxeption

Junior Full Stack Engineer

- Developed and maintained a comprehensive suite of full-stack web applications for Inxeption.com's industrial marketplace, utilizing modern technologies like TypeScript, React, NodeJS, and GraphQL.
- Collaborated with designers and product managers to translate requirements into functional and user-friendly web features.
- Resolved critical bugs efficiently, ensuring a smooth user experience for Inxeption.com's industrial marketplace users.
- Contributed with code quality by writing clean, maintainable, and well-documented code, along with unit and application testing to ensure ongoing application stability and functionality.

July 2021 - September 2022

Solvo Global/Averhealth

AR & Invoicing Specialist

- Ensured accurate and timely billing for lab tests by performing thorough monthly and daily audits of invoices.
- Identified and resolved billing discrepancies efficiently, minimizing revenue loss for Averhealth.
- Collaborated effectively with internal teams (e.g., labs, providers) to resolve billing issues promptly.

October 2020 - July 2021

Teleperformance

Bilingual CS Representative

Troubleshooted and resolved customer account issues, streaming errors, and subscription problems, ensuring a smooth user experience for Disney+ and Netflix worldwide users.

April 2017 - October 2020

OneLink/WebHelp

Back Office Agent

Troubleshooted and resolved requirements for Avianca's high value customers related to its loyalty program Lifemiles and airplane tickets reservations.
